To Whom It May Concern:

Accurate Oilfield Supply has been one of our main want list suppliers for several years. Tom Fisher and his team have been able to effectively manage our needs while maintaining a high degree of accuracy and order fulfillment.

The team at Accurate have remained competitive through the market downturn and enabled us to keep our costs low while minimizing our need to overstock on any inventory items. Through different collaborative initiatives, they have managed to quickly respond to changing needs and assist us on continuing to reduce spend without compromising quality and service.

The staff at Accurate Oilfield Supply are knowledgeable, customer focused, and dependable. I would recommend Accurate to anyone in the Oil & Gas sector that wants attention to detail, quick resolution to any issues that arise, and a partner in cost reduction for their organization. Through communication, reporting, and product knowledge they are able to strengthen relationships with the end user and deliver an exceptional supplier experience.

Feel free to contact me if you have any questions.

Sincerely,

Troy Mattie  
Supply Chain Manager
